Number formation rhymes

Say the rhyme as you write. Start at the green dot.

Start at the top and round we go, back to the start makes zero.

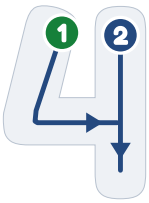

Start at the top, go straight down to the ground: that's number one, the easiest found.

Round the top and down the slide, a line along the floor: two is done with pride.

Round to the middle, then round to the end: two curvy bumps make three, my friend.

Down and across like an open door, then one long line down: that's a four.

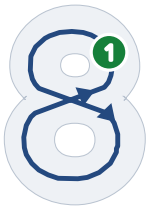

Down the neck and a big round tummy, put on a hat: five looks funny!

Curve down the side and curl round tight, a loop at the bottom: six is right.

Across the top, then slant down the hill: seven is done, now sit still.

Make an S, then back up straight: round and back, that's number eight.

A ball at the top, then a line down below: that's how nine likes to go.
