How many cubes long?

Count the cubes under each carrot. Start at the dashed line.

Name _____ Date _____

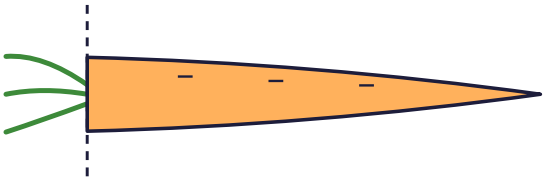

Each cube is 2 cm when printed at 100%. Ask: which carrot is the longest? Which two together make 8 cubes?

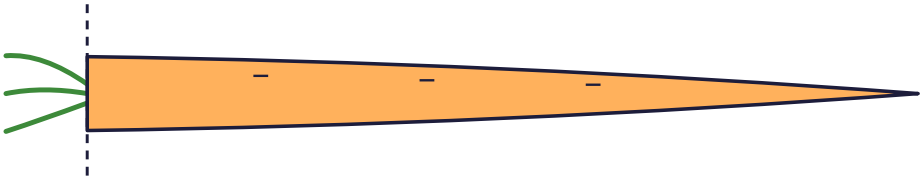

Measure the carrots in centimetres

Put the 0 of your ruler on the dashed line. Measure the orange part to the tip.

No ruler? Cut out this one (it is true size when printed at 100%).

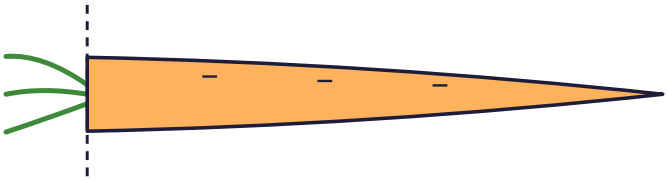

Check the print: the ruler's 10 cm should measure 10 cm on a real ruler. Print at 100% (actual size), not "fit to page".

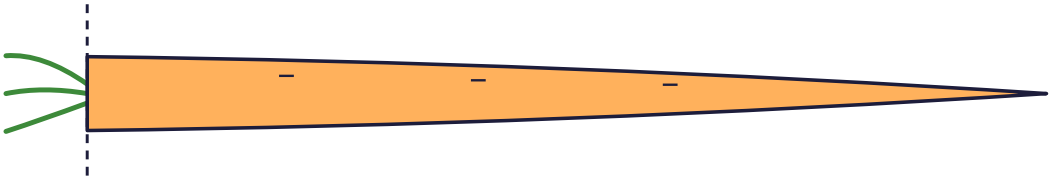

Measure the carrots in inches

Put the 0 of your ruler on the dashed line. Measure the orange part to the tip.

No ruler? Cut out this one (it is true size when printed at 100%).

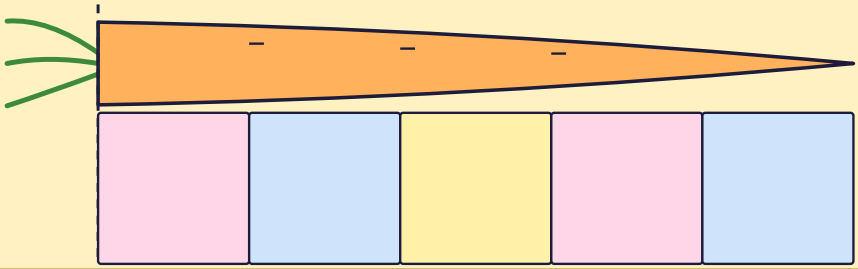

Check the print: 1 inch on this ruler should match a real ruler. Print at 100% (actual size), not “fit to page”. Halves are for grade 3.
