Dragon puppet: head and tail

Colour, cut out, then glue to the folded body strips on the next page.

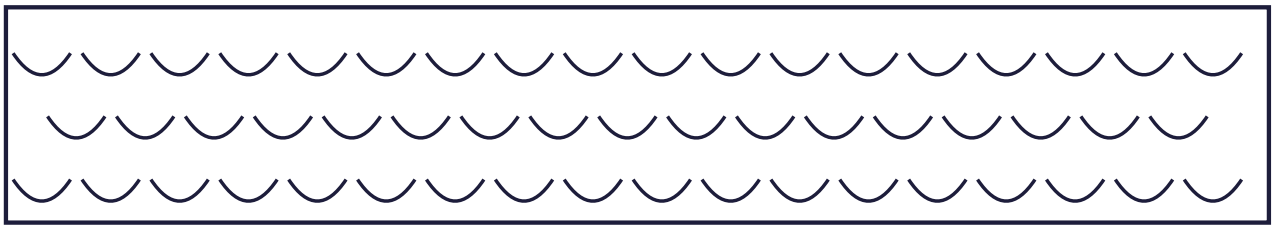

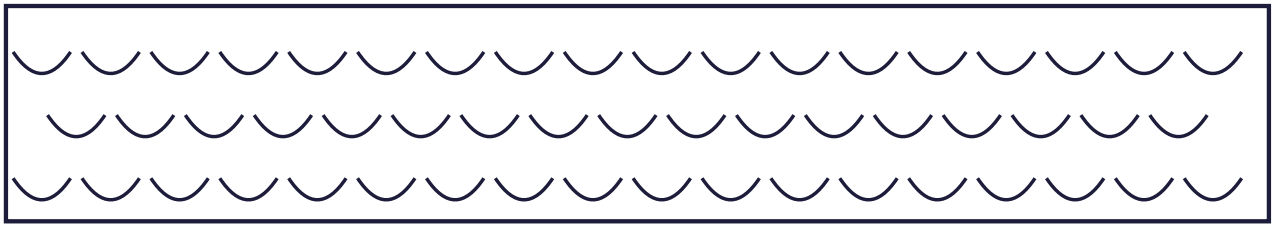

tail

Our own dragon drawing. Tape a straw or a stick behind the head and the tail to make it dance.

Dragon puppet: body strips

Colour the scales, cut out both strips, glue them in an L and fold over and over.

How to fold the body

1. Colour the head, the tail and both body strips.
2. Cut them all out.
3. Glue the end of one strip on top of the other at a right angle, like an L.
4. Fold the bottom strip over the top one, then the other over that, again and again, to make a springy square chain.
5. Glue the last two squares down, then glue the head to one end and the tail to the other.
6. Tape a straw or stick under the head and the tail, and make your dragon dance.
