Instructions

Level 2 · Year 1–2 · Grade 1–2

How to Wash Your Hands

Washing your hands helps to wash away germs. Germs are tiny living things that can make you ill. They are too small to see.

You will need:

- soap
- water
- a clean towel

1. Wet your hands with water.
2. Put some soap on your hands.
3. Rub your hands together until they are covered in bubbles.
4. Rub the backs of your hands, between your fingers, your thumbs and your fingertips.
5. Keep rubbing for at least 20 seconds. That is about as long as singing “Happy Birthday” twice.
6. Rinse off the soap with water.
7. Dry your hands with a clean towel.

When should you wash your hands? Wash them after you use the toilet, before you eat, and when they look dirty.

Questions: How to Wash Your Hands

Name _____ Date _____

1 **How long should you keep rubbing your hands? Tick one.** Find it 1b

- [ ] for 2 seconds
- [ ] for at least 20 seconds
- [ ] for an hour
