Printable ruler in inches and centimetres

Four rulers: 18 cm with millimetres on the top edge, 7 inches to 1/16 on the bottom edge. Both start at 0.

Check after printing: these squares should be exactly 2 cm and 1 inch on each side.
Print at 100% or “Actual size”. Turn off “Fit to page”, “Shrink to fit” and “Fit to printable area”.
If a square is out, so is every ruler on this page: change the setting and print again.
