Inch ruler with fractions

Four 6-inch rulers with every half and quarter inch written on, and eighths marked.

Which mark is which? The longer the mark, the bigger the part of an inch.

1 inch	1/2 inch	1/4 inch	1/8 inch

1/8 inch is half of 1/4. Count eighths for 3/8, 5/8 and 7/8: 3/8 is three marks after a whole inch.

2 cm

1 in

Check after printing: these squares should be exactly 2 cm and 1 inch on each side.
Print at 100% or “Actual size”. Turn off “Fit to page”, “Shrink to fit” and “Fit to printable area”.
If a square is out, so is every ruler on this page: change the setting and print again.
