Print check: is this page true to size?

Print this page first. If the card, the squares and the lines match, your rulers will too.

Lay a bank card here

85.6 x 54 mm: it should fit exactly

Any bank, debit or credit card fits, and so do most library cards, gym cards and driving licences: they are all one size (ISO/IEC 7810 ID-1, 85.60 x 53.98 mm). Line up one corner and look at the other three.

How to print at 100%

- Adobe Acrobat Reader: Page Sizing and Handling: Actual size.
- Chrome and Edge: More settings, then Scale: Actual size, Default or Custom 100 (whichever your version shows), never Fit to page or Fit to printable area.
- Firefox: untick Fit to page width and set Scale to 100.
- Mac Preview and Safari: Scale 100%, not Scale to Fit.
- Phones and tablets often shrink the page to fit: print from a computer if you can, and always check this page.
