Printable tape measure: 36 inches

Six 6-inch strips to cut out and glue end to end: 0 to 36 inches (1 yard), marked to 1/16 inch.

To join: cut each strip out and cut its right end exactly on its last line. Glue the grey tab of the next strip under it, so 6 meets 6, 12 meets 12 and so on. 12 inches is 1 foot; 36 inches is 1 yard.

Check after printing: these squares should be exactly 2 cm and 1 inch on each side.
Print at 100% or “Actual size”. Turn off “Fit to page”, “Shrink to fit” and “Fit to printable area”.
If a square is out, so is every ruler on this page: change the setting and print again.
