I have

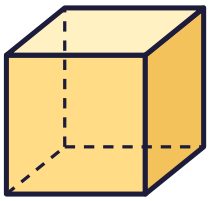

**hexagon**

Who has

a 3D shape with 6 square faces?

I have

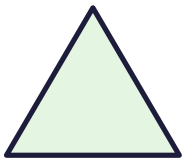

**cube**

Who has

a flat shape with 3 straight sides?

I have

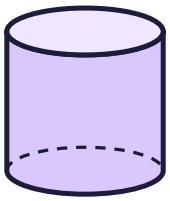

**triangle**

Who has

a 3D shape with 2 circle faces and a curved surface?

I have

**cylinder**

Who has

a flat shape with 4 square corners and sides that are not all equal?

I have

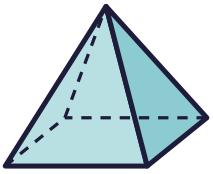

**rectangle**

Who has

a 3D shape with a square base and 4 triangle faces?

I have

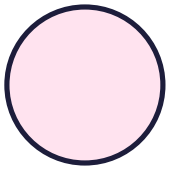

**square pyramid**

Who has

a flat shape that is round and the same width every way?

I have

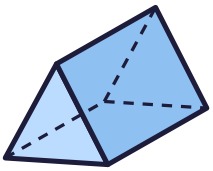

**circle**

Who has

a 3D shape with 2 triangle faces and 3 rectangle faces?

I have

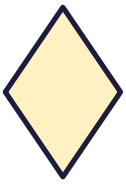

**triangular prism**

Who has

a flat shape with 4 equal sides and no square corners?

I have

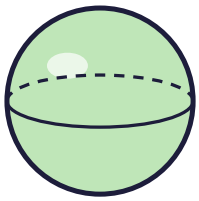

**rhombus**

Who has

a 3D shape with no flat faces at all?

I have

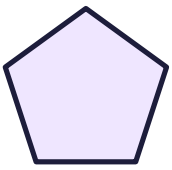

**sphere**

Who has

a flat shape with 5 sides?

I have

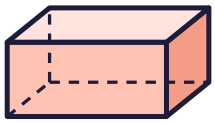

**pentagon**

Who has

a 3D shape with 6 rectangle faces that are not squares?

I have

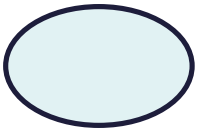

**cuboid**

Who has

a flat curved shape that is longer one way than the other?

I have

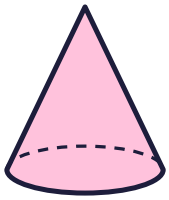

**oval**

Who has

a 3D shape with 1 circle face and a point at the top?

I have

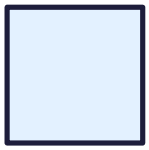

**cone**

Who has

a flat shape with 4 equal sides and 4 square corners?

I have

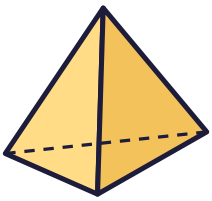

**square**

Who has

a 3D shape whose 4 faces are all triangles?

I have

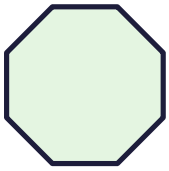

**triangular pyramid**

Who has

a flat shape with 8 sides?

I have

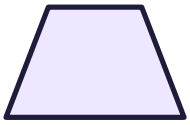

**octagon**

Who has

a flat shape with 4 sides that are not equal and no square corners?

I have

**trapezium**

Who has

a flat shape with 6 sides?
