Fold-and-cut paper shamrock

Three hearts and a stem make a shamrock. The fold makes both halves match.

Stem

1. Fold green paper in half. Lay the dashed line of a heart on the fold and trace it, or cut this page.
2. Cut along the solid line only. Do not cut the fold.
3. Open it up: one whole heart. Make three.
4. Glue the three points together in the middle, then glue the stem underneath.

A shamrock's three leaves are the same shape: a heart is symmetrical, so one fold gives two matching halves.

Rainbow paper chain strips

Colour each strip, cut it out, loop it and glue. Join the loops in rainbow order.

red	orange	yellow	green	blue	purple
red	orange	yellow	green	blue	purple
red	orange	yellow	green	blue	purple
red	orange	yellow	green	blue	purple
red	orange	yellow	green	blue	purple

Ink saver: print on coloured paper, or colour each strip in the colour written on it.
