3D gingerbread house

How to make it · 30–45 minutes

You need

Thin card (160–200 gsm) · Scissors and a glue stick · Sweets, sequins or paper shapes to decorate (optional)

1

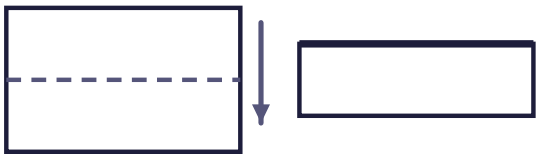

Colour the walls and roof before you cut: windows, a door, icing and sweets.

2

Cut round the walls and the roof along the solid lines.

3

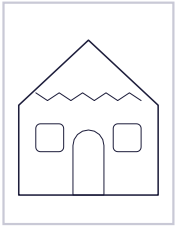

Fold along every dashed line. Glue the yellow tab of each strip inside the end of the other strip to make a box.

4

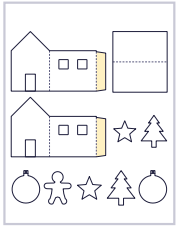

Fold the roof in half and glue it on top of the walls.

Pick a level: print only the page you need
